Open Innovation

We do not want to tie you down with problem statements, hence, if you are a free thinker and already have solutions to problems, then this track is for you.

This track has no boundaries. Just put on your thinking caps and innovate on the coolest hacks you can come up with!

Track Details

- The participant can make any hack of his choice.
- The project will be judged based on how well the technology that the participant choses is integrated into the hack and on the innovativeness of the project along with a few additional parameters.
- The technology used for the hack should be thoroughly mentioned in the description when submitting the hack.
- The demo video should convey the practical implementation of the idea.
- Some suggested fields for the hacks are Web Development, App Development, Machine Learning, Game Development, Pandemic Relief, Public Safety etc (These are just ideas. The participant is free to work on his own idea)
- Participants of this track will be eligible for the 1st, 2nd and 3rd prize of TechnoHack.
