# Blockchain

*The future lies in Decentralization and Transparency. This track is for blockchain enthusiasts who love to decentralize their way to victory!*

The technology at the heart of bitcoin and other virtual currencies, blockchain is an open, distributed ledger that records transactions between two parties efficiently and in a verifiable and permanent way.

## Track Details

- The main intention of this track is to build hacks using blockchain technology.
- The hack should be made and deployed on any of these blockchain networks: Tezos, portis, ethereum, polygon, celo.
- The working of the deployment should be included in the demo video.
- Technohack or IEDC MEC is not responsible for the delivery of the prizes.
- The final decision regarding the prizes will be taken by Devfolio.
- Some idea for the hack include  decentralized banking, farming, micro finances etc, smart contracts based institutions, Peer To Peer Ridesharing,Blockchain-Based Voting System,Charity Application,A Decentralized Web Hosting System etc
